

Model 20 HT/GT Mixer
 With a high efficiency gearbox in right angle and parallel shaft configurations, modular design and a wide range of speeds, these agitators provide outstanding application versatility.

MR Mixer
 Metric unit that combines quality, durability, and economy to supply unbeatable value in mixing equipment for the chemical, water and general processing industries.

HT Mixer
 Known for its reliability and flexibility, the HT can be used for any top entry application, simple or complex, up to 1000 HP. We have over 75,000 in service today.

QED^{Plus} Mixer
 Value priced, right angle mixer with a dry well and proprietary worm gear designed specifically for mixing.

HS Mixer
 Side entry agitator that is a great alternative to top entering selections for extremely large tanks or when limited headroom constraints are present.

HTM Mixer
 Available for extremely large applications in a right angle or parallel drive with all the same options as the HT.

BT Mixer
 Biopharma mixer used in any sanitary application. We offer an extensive submittal package to meet the latest FDA requirements.

XP Mixer
 Portable mixer that is available in a bung or clamp mounting arrangement. Most standard designs can be shipped within 48 hours.

DT Mixer
 Small mixer that has many sealing, drive, and wetted parts options and provides long term, trouble free service. These units are also readily available with right angle or parallel drives.

QC Tote Mixer
 Tote mixer with a quick connect drive that can be modified to fit any tote.

KM Static Mixer

With the longest list of installations in the industry, the detailed design capabilities of this mixer offer guaranteed mixing results.

KMX-V Static Mixer

Cross-stream mixing and flow splitting allow this unit to handle even the most extreme viscosities and volumetric ratios in the laminar flow regime.

UltraTab Static Mixer

Designed for low viscosity mixing such as chemical dosing, water treatment and desalinization applications.

HEV Static Mixer

With the lowest pressure drop per degree of static mixing available, this is ideal for low viscosity liquid or gas blending applications.

Heat Exchanger

Edge-sealed elements dramatically improve heat transfer coefficients in high viscosity applications.

Colloid Mill

Specifically designed to disperse solids and liquids into a carrying fluid, producing stable emulsions to the sub-micron particle range.

Homogenizer

High speed high shear batch mixer ideal for fast blending and homogenizing of materials through a wide range of viscosities.

Pipeline Mixer

Designed for inline, continuous high shear homogenizing, mixing, emulsifying and rapid dispersing.

MD Mixer

Side entry belt driven with a modular bearing cartridge design allowing longer operating runs between maintenance periods.

PB Mixer

Combines the proven features of the MD series with the simplicity of the pillow block bearing design.
